

LUCA BUONOCORE

Junior Product / Project Manager

lucabuonocore.03@gmail.com | +39 345 960 3238 | [LinkedIn](#) | [Portfolio](#)
Italian (Native) · English (C1) · French (A2) | Based in Mantua, Italy — open to relocation

PROFILE

Computer Science student who works at the intersection of project management, product management, and AI. Author of an academic thesis on AI adoption in project management, with hands-on experience building AI-driven products and prototypes. Strong technical foundation paired with the communication skills to work across engineering, design and business stakeholders. Comfortable with ambiguity, proactive, and used to owning problems end to end — from research through to a shipped, tested solution.

PROFESSIONAL EXPERIENCE

Project Manager — Provincial Agency for Healthcare Services (APSS) — *Public sector* 2025 · 5 months

- Tracked milestones, dependencies and risks for an IT infrastructure renewal across **17 healthcare facilities**, using Gantt charts and critical-path analysis with weekly status reporting.
- Coordinated with network engineers and department stakeholders to translate technical and compliance requirements into a clear action plan, introducing **Agile** to manage evolving needs.

SELECTED PROJECTS (FULL CASE STUDIES LINKED)

Groove — Nightlife-Discovery Platform — *Co-Founder & Head of Project & Product* 2024 – 2025

- Led a cross-functional team of **9 people** (engineering, design, finance) from idea to a shipped MVP pitched to investors, securing **€100K in conditional funding**.
- Ran user research with **500+ respondents** and validated the core assumption with a **Wizard-of-Oz test** — manually simulating the AI recommendation engine before building it — cutting event-discovery time from a self-reported ~30 minutes to an observed ~5.
- Mediated a cross-role conflict between engineering (compliance-driven) and design (UX-driven) on age verification by reframing around the shared goal, and rebuilt team alignment after a stakeholder raised doubts about market viability, using a structured competitive analysis.

100Flows — AI in Project Management (Thesis) — *Research* 2025 – Present

- Research across **5 core PM domains**, built on **50+ academic papers** and **8 direct interviews with PMs** at global tech companies, on where AI creates real value in project workflows.
- Currently designing a **multi-agent AI system** for structured project risk analysis, framed around reasoning under uncertainty rather than prediction — validating the design with senior PMs at companies including Microsoft and Amazon.

SkillForge — E-Sports Coaching Marketplace — *Product Discovery* 2024

- Ran structured research (**350 respondents, 25 interviews**) and competitive analysis, then made the disciplined call to **stop development** once the underlying economics didn't hold up.

FitGYM44 — Fitness SaaS (University SE Project) — *Project Lead · Agile/Scrum* 2023 – 2024

- Led a 3-person Agile team across **5 sequential deliverables**; authored 30+ requirements and a full UML/OCL specification across a 9-module architecture. Final grade 28/30.

EDUCATION

BSc in Computer Science (Engineering) — **University of Trento** — *currently enrolled* 2022 – Present

CERTIFICATIONS

- Generative AI for Project Managers (PMI)** · **Practical AI for Project Managers (PMI)**
- Microsoft AI Product Management Certificate** · **Certified Associate in Project Management (CAPM)** — waiting to take the exam

SKILLS

Product & Project: Requirements & user stories, PRDs, roadmapping, user research, competitive analysis, KPI tracking, stakeholder management

Ways of working: Agile, Scrum, Gantt / critical-path planning, cross-functional leadership, Notion, Jira, Figma

AI & Technical: AI-in-process research, prompt engineering, SQL & relational databases, Python, React, Java, C/C++, JavaScript, HTML/CSS
